PARENTS INFO

DEAR PARENTS

We are looking very much forward to welcome your children to the ESKIMOS Ski & Snowboard school. Please find here some tips & tricks for your children equipment as well the organization for the future ski & snowboard PRO'S!

CLOTHING

We love snow and the fairy tale world, but this means cold temperatures. Therefore we STRONGLY recommend warm & waterproof ski / snowboard clothing. Gloves should be not too tight and waterproof would be the best. Wearing thermal underpants will help the child to stay warm during the entire period of the lesson. A neck and mouth scarf and a good goggle is helping your child get through each snow storm.

SUNSCREEN

We got plenty of „SUN“ days in Saas-Fee as well for cold days we recommend to use sunscreen every day for your child for the lesson. We recommend to use an high factor and special sunscreen for children. For more information please ask the pharmacy near you.

BODY PROTECTION

Each ESKIMOS coach is wearing a helmet for protection. We highly recommend to buy or rent a helmet for your child's lesson. To complete the outfit & protection we prefer to wear goggles. A good lens will make the lesson of your child clear and fun in every weather. Together we want to give your child a good, safe and confident feeling to enjoy the lesson.

RECOGNISABILITY

The ESKIMOS kids group will get each a helm bib for a brighter togetherness.

EMERGENCIES

Please double check the first day your mobiles phone numbers for an emergency. Allergies and others please inform the office as well the instructor on the first day.

FIRST DAY AT SKI / SNOWBOARD SCHOOL

Please make sure you will explain and inform your child a day before about the time with ESKIMOS school. Please also plan enough time to start the mornings for ski / snowboard school without hectic. To get dressed with winter clothing & gear and then to walk to the meeting point needs extra time.
